

Ovilac Excellence

1. 100% Dairy formula

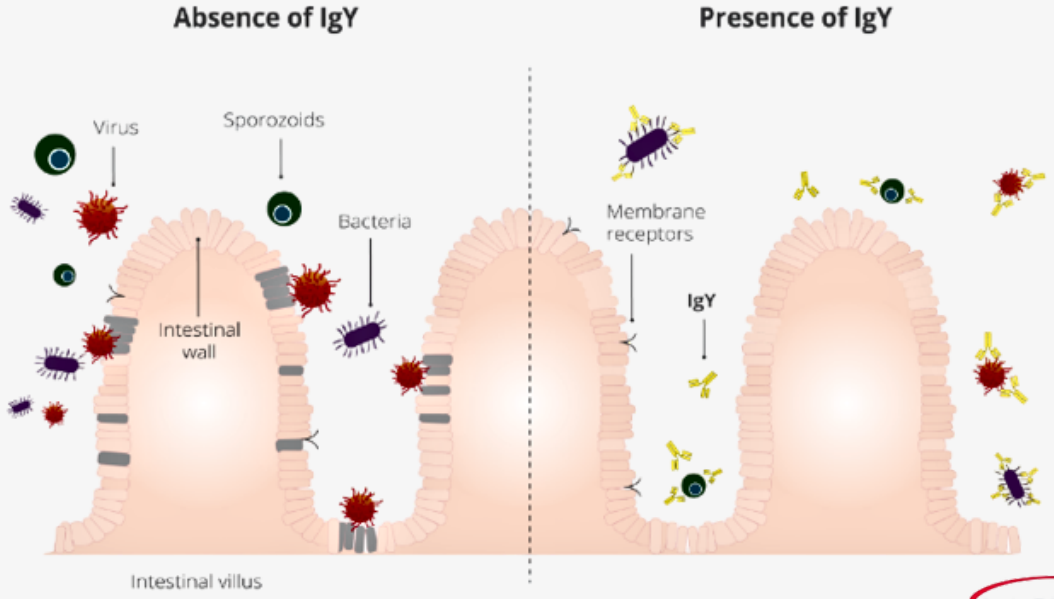

Milky period for rearing goat kids is really important to assure profitability for, farmers. For this, the formula containts a high level of protein. The aim is to have harmonius growth in order to prepare the goat kid to become a dairy goat. With the high level of skim milk powder, the digestion is secured by the creation of a clot in the abomasum of the young animal. The digestion will be longer. Fatty acid profile is formulated for an optimal digestion, and fats are micro encapsulated to avoid oxydation.

2. Booster of immunity

The immune system is an internal protection that defends the body against pathogens. Youngs are exposed from birth to stressful situations that can alter their health and reduce their growth.

Colostral phase is really important for a good start of kid with the transfer of immunity. In order, to avoid a gap between passive and active immunity, Ovilac Excellence is supplemented with specific **immunoglobulines (IgY)**.

OVILAC eurovo

3.

Take care of intestinal barrier

The gut wall is a barrier between the animal and its environment. It is necessary to ensure its development and encourage the installation of a beneficial flora to compete with an undesirable flora responsible for diarrhoea. Place of exchange of nutrients, it is essential that the wall is well developed for a better efficiency of food.

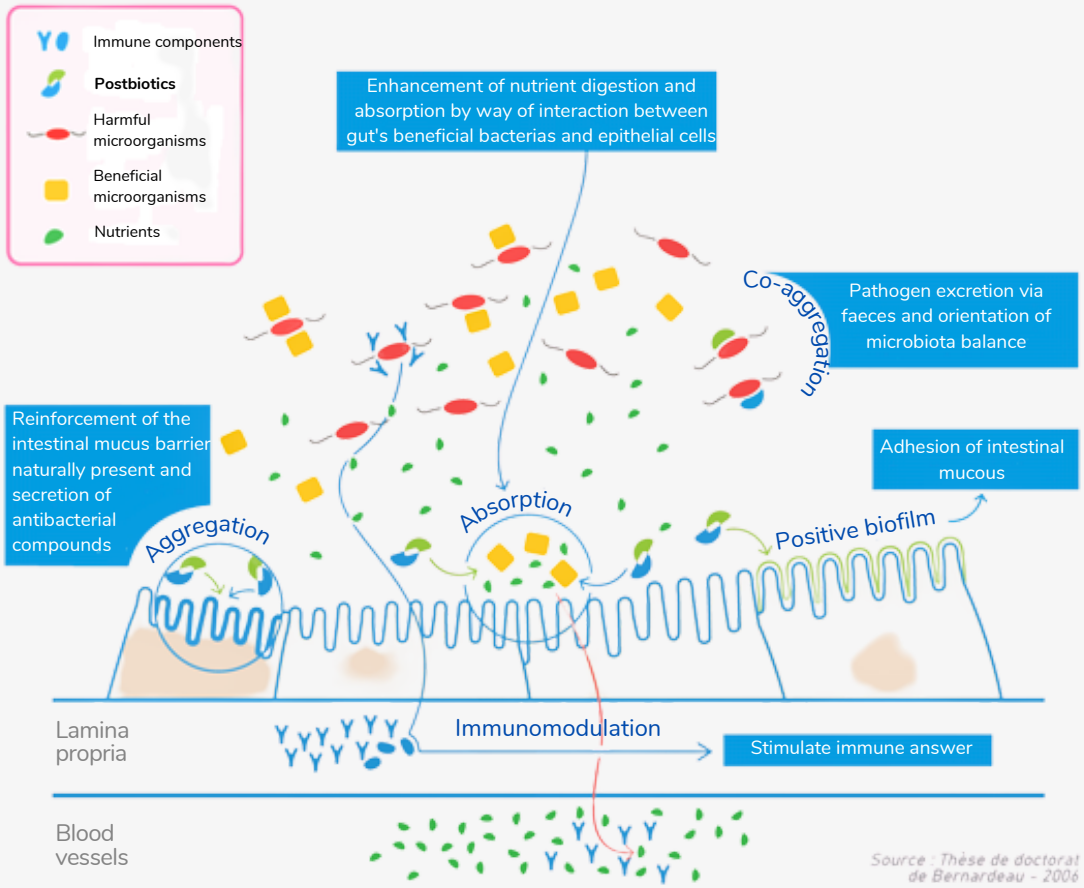

An supplementation in postbiotics added in Ovilac Excellence. **Postbiotics** is a preparation of inanimate and their componants, that confers a healt benefit on the host

Two origins of Lactobacillus for two effects :

- Hygienization of the digestive tract
- Barrier effects to prevent the adhesion of pathogens

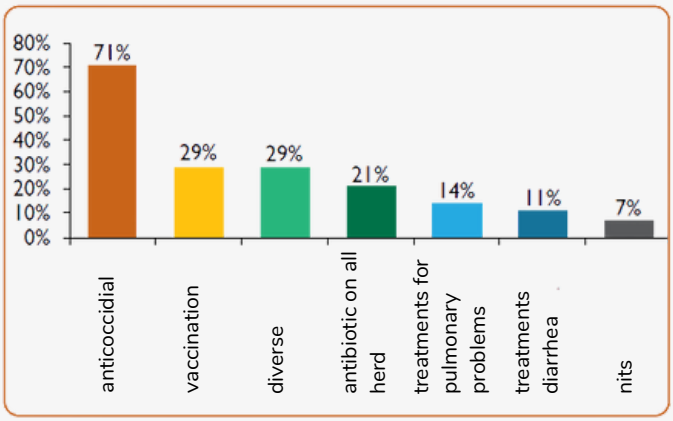

A role on the decrease of the risk to have digestive disorder by an antimicrobial effect on Clostridium perfringens ; E.coli ; Salmonella.

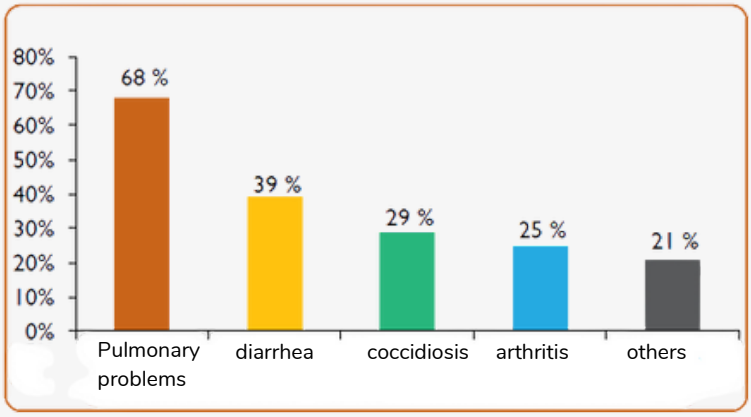

4. Fight against parasites

In 2014, an IDELE's study on rearing goat kid, have shown the importance of coccidiose in farm. It can have many clinical and zootechnical consequences. The most important are diarrhea, stunting and even, in some cases, mortality. Thus, this disease can have a major impact on the health and well-being of goat, as well as on the economic performance of farms and the sector.

Proportion of farms concerned according to the type of treatment

Proportion of farms concerned according to the type of pathology

In order, to prevent differents diseases be due to parasites, a blend of **essential oils** is put in the formula. His role is to prevent digestif disorders due to protozora (cryptosporidiosis and coccidiosis). The molecules of essential oils have a toxic activity on protozoa and therefore block sporulation.

This product also contains **acidifiers** which help in the development of the villi and mucous membranes of the intestinal wall. A larger exchange surface allows better absorption of nutrients. The last but not least additives is **Proviox** which supports the development of the immune system and improves defense reactions to stress. Its antioxidant action is linked to the presence of vitamins C and E, organic selenium and grape extracts.

With this global package, **Ovillac Excellence** give the keys of goat kids for a better growth : top immunity and optimal digestion
